THE REGISTRAR,
Thiruvalluvar University,
Serkkadu, Vellore – 632 115.

Respected Sir,

Sub.: Sanction letter for the consultancy project to Department of Biotechnology, Thiruvalluvar University – Industrial Consultation Project (for One year 2019 – 2020) – Regarding.

Greetings from Farmagain!

I am very glad to mention about our last very memorable meet which I was feeling highly an energetic. In connection with that, We **Farmagain Agro Private Limited** are writing this sanction letter to submit for your kind approval to make fruitful deliverables with the target oriented technical at Department of Biotechnology, Thiruvalluvar University in the domain of Techno-Commercialization Research for the Industrial need.

We, **Farmagain** thrive for Agriculture and Environmental Solutions with the scope of Agricultural Biotechnology Products, Eco-Benign Solutions, covering the need for technology transfer in the Organic Agriculture and Drip Irrigation technology. Our technology enterprise believes in the power of Sustainable Agriculture environment.

We are very happy to give an Industrial Consultancy Project on “**Validation of agriculture pest managaent**” with the objective of Environmental benign agriculture methods to control pests towards ecofriendly approach with zero waste concepts. The total budget is Rs. 21,15,000/- (Rupees Twenty One Lakh and Fifteen Thousand Only) and estimation for One Year project (01-05-2019 to 31-05-2020) is for the development and validation of the Research (See ANNEXTURE 1).

Hereby, we would like to give this project to the team direct as the Principal Investigator on this collaborative consultancy research work.

Farmagain Agro Private Limited

4th Floor of 4,5 & 6 Aditya Complex, Gaurav Nagar, Kothnur Dinne Main Road JP Nagar 7th phase, Bengaluru 560078

20, 2nd Layout, Krishnasamy Nagar, Ramanathapuram, Coimbatore 641103

Registered Office: 97, Teachers Colony, Perumalpuram Post, Tirunelveli 627007

ELIES Biotech, a food and agricultural biotechnology products manufacturing

Well equipped laboratory facility for Mushroom Spawn production and Manufacturing facility for Oyster Mushroom cultivation

Well established manufacturing facility for the production of Bio-inoculants to encourage and support the use of effective microorganisms as well as bio-fertilizers as an eco-friendly alternative to chemical fertilizers

Well established culture facility for the production of green micro algae and blue green algae having various applications such as protein supplement, fertilizer and fodder

Training and Internship programs exclusively for the farmers and students to promote organic cultivation strategies and to create awareness

A technological hub between the farmers, students, research institutions, academicians and technical experts.

Unique Quality management systems in all aspects.
