Intellectual Property Cell

In an increasingly technologically driven world, university research is the cornerstone of any country's economic development. The university makes deliberate efforts to encourage multidisciplinary research and institutional collaboration in order to match its focus with the national aim of achieving technological self-reliance.

To protect intellectual property rights for the university's many highly skilled students and knowledgeable faculty, the IPR cell employs a comprehensive IP strategy. Regular university projects and research endeavours with the potential for innovation. Thus, we are currently putting in place organised procedures to find, support, and foster innovation.

There is nearly usually a separate entity in business organisations that is tasked with IP strategy. Of course, the goal here is to maximise IP profits through commercialization. However, in academic institutions like ours, the situation is different. In this case, the benefits in terms of improved goodwill and portfolio value are more significant than financial gains.

The Institute views research as a professional practise rather than a career. The purpose of the IPR cell is to support inventors with safeguarding their intellectual property rights and to increase their confidence in developing IPR, which will help our institute become financially self-reliant.

Objectives

- To create an awareness about IPR for faculties and students of the University
- To conduct workshop, seminar and Training course on IPR
- To Important Tanning on future endeavors regarding patent filling process
- To encourage faculty members and scholars to go for patentable works.

A Primer on Intellectual Property (IP)

Intellectual property refers to creations of the mind; such as designs, music, art, technological inventions and writing. It is the legal rights for intellectual activity undergone in the industrial, scientific, literary and artistic fields.

Types of IPR

Patents

A Patent is a statutory right for an invention granted for a limited period of time to the patentee by the government, in exchange of full disclosure of their invention for excluding others, from making, using, selling, importing the patented product or process for producing that product for those purposes without his consent

Designs

'Design' means only the features of shape, configuration, pattern or ornament or composition of lines or colour or combination thereof applied to any article whether two dimensional or three dimensional or in both forms, by any industrial process or means, whether manual, mechanical or chemical, separate or combined, which in the finished article appeal to and are judged solely by the eye.

Trademarks

A trademark is a visual symbol which may be a word signature, name, device, label, numerals or combination of colours used by one undertaking on goods or services or other articles of commerce to distinguish it from other similar goods or services originating from a different undertaking.

Copyrights

Copyright is a right given by the law to creators of literary, dramatic, musical and artistic works and producers of cinematograph films and sound recordings. In fact, it is a bundle of rights including, rights of reproduction, communication to the public, adaption and translation of the work. There could be slight variations in the composition of the rights depending on the work

Geographical indications

Geographical indications of goods are defined as that aspect of industrial property which refer to the geographical indication referring to a country or to a place situated therein as being the country or place of origin of that product

Plant variety protection

Protection granted for plant varieties, the rights of farmers and plant breeders and to encourage the development of new varieties of plants

Semiconductor Integrated circuits layout – Design

Protection granted for layout design in semiconductor integrated circuit and for matters connected therewith

Aim of this Lecture is all the participations are learn the following thinks,

- Looking for fast growth in your domain, choose a career in IPR
- How Novartis AG is filing large number of patents?
- Innovating India's Pharmaceutical Industries
- Know why there is bulk requirement of IP professionals in Pharma companies
- Why Wockhardt would be needing more patent engineers?
- Build a global career in IP Laws ?

Introduction to eBooks: eBooks (also written as e-books e-Books) are increasingly occupying a large portion of any discussion that involves publishing or publishers. While many of us are told that eBooks (and e-Publishing, the process of publishing eBooks) are an inevitable part of the future landscape of publishing and, therefore, must receive due attention from publishers that do not wish to be driven to extinction, very little information about it is readily available.

Always available: Given the fact that eBooks do not occupy any shelf-space and can be easily reproduced, publishers need not worry anymore about limited shelf exposure or an out-of-print backlist. eBooks have allowed publishers to have greater visibility for their entire list.

List of e-books for IPR

1. "Law Relating to Intellectual Property Rights" by V K Ahuja
2. "Intellectual Property Rights" by Neeraj Pandey and Khushdeep Dharni
3. "Law Relating To Intellectual Property Rights" by V K Ahuja
4. "Law Relating to Intellectual Property, 2011 (Reprint)" by B L Wadehra

5. **“Intellectual Property Rights: Text and Cases” by R Radhakrishnan and S Balasubramanian**
6. **“Intellectual Property Rights-Infringement And Remedies” by Ananth Padmanabhan**
7. **“Intellectual Property Rights In India” by V K Ahuja**
8. **“Intellectual Property Rights (IPRs): TRIPS Agreement and Indian Laws” by E T Lokganathan**
9. **“The Moral Dimensions of Intellectual Property Rights” by Steven Ang**
10. **“Text Book of Intellectual Property Rights” by N K Acharya**

Hence final section of this class clarifies the dough of the participations of this program by the teacher. After that giving vote of thanks by the one of the student the program is cuss fully complete.
